FEATURES

- Luxurious
- Efficient
- All-Weather
- Wing Lockers for Gear Storage

Centurion Flight Services has been providing safe and efficient air charter since 1983.

Your safety and comfort is our number one concern!

The King Air C90B masterfully combines comfort, performance and economy. On a typical trip of 500 miles, the KA C90B outshines light business jets and the KA 200 on fuel and operating costs, while getting passengers to their destinations at nearly the same time due to the Blackhawk modification.

The KA C90B is amazingly fuel-efficient. With a maximum range of nearly 1,300 nautical miles, the plane easily carries five to seven passengers in a

cabin so roomy and spacious that it is easy to work, conduct meetings, or just stretch out and enjoy the trip.
